

Can Israel - divided in half and a few miles wide - survive global Islamist terrorism?

Al Qaeda

Hamas

Iran

Fatah

Hezbollah

Al Aqsa
Brigade

Why does the U.S. promote this one-sided surrender by Israel?

If the Annapolis Summit and Roadmap become reality...

Israel is expected to surrender:

- A vital part of Jerusalem
- The Western Wall
- The Temple Mount
- Christian and Jewish Holy Sites
- 95% of Judea & Samaria
- Homes and businesses of 100,000 residents
- Construction in Jerusalem (Har Homa & Atarot)
- Billions of \$ to establish a terrorist Palestinian State
- Security – by releasing Arab terrorists from prison
- Potentially the Golan Heights
- Any Jewish presence in the new Palestinian state
- Opposition to “the right of return” and they must absorb millions of Palestinian refugees and their descendants who chose to leave Israel - while disregarding rights of a comparable number of Jews expelled from Arab countries.

Palestinians are expected to offer:

- Another promise for future “peace” – however, Palestinians insist that even after all negotiations, they will never recognize Israel as “a Jewish state.”

The Palestinian Strategy: Divide and Conquer

Creating a contiguous terrorist state in Israel’s Heartland will divide Israel into two parts and make the miniscule state of Israel indefensible against Arab aggression.

Becoming militarily vulnerable, Israel could eventually fall prey to the radical Islamic Jihadists who are determined to wipe the Jewish state off the map.

Who We Are: Unity Coalition for Israel

Founded in 1991, we are the largest worldwide coalition of Jewish and Christian organizations, with more than 200 groups representing millions of people dedicated to Israel. Israel is not just a Jewish issue. Millions of Christians resolutely endorse the principle of peace with security for the state of Israel. Though we have many different backgrounds, we have one common goal.....

A Safe and Secure Israel.

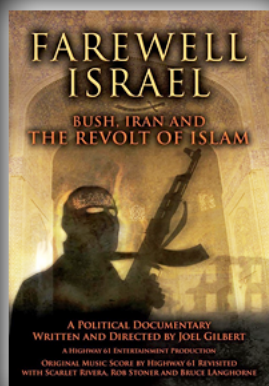

**President Bush,
How would you defend a country
9 miles wide?**

**On December 3, 1998, you said,
“In Texas, we have driveways longer than that.”**
