

The Arab World...and Israel

Does the World Need a 23rd Arab State?

Is there no room in the 22 existing Arab states to absorb the Palestinians who chose to leave Israel in 1948, as 5 Arab nations attacked the new state?

- The Arab world has oil resources and extensive land mass to accommodate their brethren, the Palestinians.
- They share the same culture, including language and the Islamic religion.

Creating a terrorist state in Israel's Heartland would reward terrorism and provide a new base for global Jihad.
